

The Oily Crossway

By: Hamza Haque, Mustafa Kamal, Kumail Abbas, Suvan Poudel,
and Aahnaf Tahmid

What is the Oily Crossway?

- Built in April 14, 2019 by five grade 7 kids.
- Broke the 7-7 Record for fastest time to build a bridge!
- Purpose: To help drivers cross the Oily River from Salty City to Oil City.
- Made out of Spaghetti and Fettuccine.

Materials

Spaghettini

Fettucine

Paper

Pencil

Hot Glue gun

Rubber bands

Steps

1. Draw a triangular design for your bridge
2. Get the materials that are needed
3. Get a lot of spaghettini and group them using rubber bands.
4. Hot glue gun at least 12 groups of spaghettini and make them match design.
5. Use spaghettini for triangles
6. 2 flat surfaces - will become the road by gluing fettuccine together.
7. Connect road on top of the spaghettini, then connect triangles on side.

Problems

- Switch design
- Lack of glue guns
- Spaghetti was able to break very easily
- Normal paint didn't work.

Interesting Facts

Mass Structure

Made out of Spaghettini and Fettuccine

Only took 2 days!

Interesting smell

Can withstand at least 3.5 kg

Thank You For
Listening.
